

- 1 (a) A group of 20 children were asked to choose their favourite type of fruit juice. The results are listed below.

Orange	Apple	Apple	Pineapple	Mango
Tropical	Orange	Mango	Apple	Mango
Pineapple	Apple	Apple	Mango	Orange
Apple	Mango	Pineapple	Orange	Apple

- (i) Complete the frequency table for the results. You may use the tally column to help you.

Type of juice	Tally	Frequency
Orange		
Apple		
Pineapple		
Mango		
Tropical		

[2]

- (ii) Draw a bar chart to show these results. Remember to mark the scale on the frequency axis.

[3]

- (iii) Sarah has a pack of 20 cartons of juice. 5 are orange, 5 are apple, 5 are pineapple and 5 are mango. She would like to give each child their favourite type of juice.

How many children will **not** get their favourite type of juice?

..... [1]

- (b) One litre of a mixed fruit drink contains 550 millilitres of apple juice.

Write down the fraction of the drink that is apple juice.
Give your answer in its simplest form.

..... [2]

- (c) Amir wants to buy a bottle of fruit juice.
There are three sizes of bottle.

0.9 litres \$2.40

1.25 litres \$3.15

1.35 litres \$3.50

Work out which size of bottle gives the best value.
Show how you decide.

..... [3]

- (d) The amount of juice in a glass, j millilitres, is 150 millilitres correct to the nearest 10 millilitres.

Complete this statement about the value of j .

..... $\leq j <$ [2]

- 2 (a) Here are five number cards.

Place two cards side-by-side to show

- (i) a two-digit multiple of 7,

[1]

- (ii) a two-digit square number,

[1]

- (iii) a two-digit cube number,

[1]

- (iv) a two-digit prime number.

[1]

- (b) $\sqrt{2}$ 5.85 4.1^2 π

Write down all the numbers in this list that are irrational.

..... [1]

- (c) Put one pair of brackets into this calculation to make it correct.

$$7 \times 5 - 2 + 3 = 42 \quad [1]$$

(d) Work out.

(i) $\sqrt[3]{0.729}$

..... [1]

(ii) 5^4

..... [1]

(iii) 4^{-2}

..... [1]

(e) (i) Write 60 as a product of its prime factors.

..... [2]

(ii) Find the lowest common multiple (LCM) of 36 and 60.

..... [2]

- 3 (a) Here is part of a bus timetable.

Town Hall	10 15	10 35	10 55	11 15
City Gate	10 32	10 52	11 12	11 32
Beacon Hill	10 58	11 18	11 38	11 58
Kingswood Park	11 10	11 30	11 50	12 10

- (i) Yana leaves home at 10 50.
She takes 14 minutes to walk to the bus stop at City Gate.

At what time does she reach the bus stop?

..... [1]

- (ii) She gets on the next bus to Kingswood Park.

At what time does this bus arrive at Kingswood Park?

..... [1]

- (iii) Work out how many minutes the bus takes to get from City Gate to Kingswood Park.

..... min [1]

- (b) Ivan walks 1.5 km from his home to Kingswood Park.
He takes 20 minutes.

Work out Ivan's average speed in kilometres per hour.

..... km/h [1]

- (c) The scale drawing shows a map of Kingswood Park.
 There are two straight paths and one circular path.
 The scale is 1 centimetre represents 200 metres.

- (i) Yana walks along the straight path from East Gate to West Gate.

Work out the distance she walks.
 Give your answer in kilometres.

..... km [2]

- (ii) Measure the bearing of South Gate from North Gate.

..... [1]

- (iii) The entrance to a children's play area, *P*, is 500 metres from North Gate on a bearing of 195° .
 Mark the position of *P* on the map. [2]

- (iv) Ivan runs around the circular path once.

Calculate the distance Ivan runs.

..... m [4]

4 (a) A cuboid has length 4 cm, width 3 cm and height 1.5 cm.

(i) Calculate the volume of the cuboid.

..... cm³ [2]

(ii) On the grid, draw an accurate net of the cuboid.
One face has been drawn for you.

[3]

(b)

NOT TO SCALE

In the diagram, all lengths are in centimetres.

- (i) Find an expression, in terms of x , for the perimeter of the shape.
Give your answer in its simplest form.

..... [2]

- (ii) The perimeter of the shape is 72 cm.

Work out the value of x .

$x =$ [2]

- (iii) Calculate the total area of the shape.

..... cm² [3]

5 (a) The table shows the age and the total distance travelled for 10 cars.

Car	A	B	C	D	E	F	G	H	I	J
Age (years)	5	9	12	3	7	4	10	11	5	9
Total distance (thousand km)	86	126	156	48	148	60	70	150	105	138

(i) Find the mean age of the cars.

..... years [2]

(ii) Complete the scatter diagram.
The first six points have been plotted for you.

[2]

(iii) What type of correlation does the scatter diagram show?
 [1]

(iv) Draw the line of best fit on the scatter diagram. [1]

(v) Use your line of best fit to estimate the total distance travelled by a car that is 6 years old.
 thousand km [1]

(vi) Car G travelled less than the average number of kilometres per year.
 Explain how you know this from your scatter diagram.
 [1]

(b) Juan is a car salesman.

(i) Last year, Juan sold 75 small cars, 45 medium cars and 30 large cars.
 Find the ratio small cars : medium cars : large cars in its simplest form.
 : : [2]

(ii) Ana wants to buy a car with a price of \$2550.
 Juan reduces the price by 12%.
 Calculate the amount Ana pays for this car.
 \$..... [2]

(iii) Juan advertises a car for sale.

Plan A	Cash price \$4500
OR	
Plan B	15% of the cash price plus 36 monthly payments of \$120

Work out how much more it costs to buy the car using Plan B than using Plan A.

\$..... [3]

6

(a) On the grid,

(i) draw the line $y = 3$, [1]

(ii) draw the line that is perpendicular to the line $y = 3$ that passes through the point $(1, -4)$. [2]

(b) Complete the table of values for $y = 2 - 3x - x^2$.

x	-5	-4	-3	-2	-1	0	1	2
y		-2	2			2	-2	

[2]

(c) On the grid, draw the graph of $y = 2 - 3x - x^2$ for $-5 \leq x \leq 2$.

[4]

(d) Write down the co-ordinates of the highest point of the graph of $y = 2 - 3x - x^2$.

(..... ,) [1]

(e) Use your graphs to solve the equation $2 - 3x - x^2 = 3$.

$x = \dots\dots\dots$ or $x = \dots\dots\dots$ [2]

7 (a)

NOT TO SCALE

The diagram shows three straight lines crossing at a point.

(i) Find the value of x .

$x = \dots\dots\dots$ [1]

(ii) Work out the value of y .

$y = \dots\dots\dots$ [1]

(b)

NOT TO SCALE

A , B and C are points on the circumference of a circle.

Explain why AB must be a diameter of the circle.

.....
 [2]

(c)

NOT TO
SCALE PQR is a right-angled triangle.Use trigonometry to calculate PR .

$$PR = \dots\dots\dots \text{ cm [2]}$$

(d)

NOT TO
SCALE KLM is a right-angled triangle.Calculate KL .

$$KL = \dots\dots\dots \text{ cm [3]}$$

8 (a)

(i) On the grid, draw the image of triangle *A* after a reflection in the line $y = -2$. [2]

(ii) Describe fully the **single** transformation that maps triangle *A* onto triangle *B*.

 [2]

(iii) Describe fully the **single** transformation that maps triangle *A* onto triangle *C*.

 [3]

- (b) On the grid, draw the image of shape S after an enlargement with scale factor $\frac{1}{3}$, centre C .

[2]

9 (a) $p = 4r - 3t$

(i) Calculate the value of p when $r = 5$ and $t = -6$.

$p = \dots\dots\dots$ [2]

(ii) Make r the subject of the formula $p = 4r - 3t$.

$r = \dots\dots\dots$ [2]

(b) Expand the brackets and simplify.

$$4(3x - 2) - 3(x - 5)$$

$\dots\dots\dots$ [2]

(c) Factorise completely.

$$12ab - 20a^2$$

$\dots\dots\dots$ [2]
